5. The water is to be diverted from its source at the following point: (Describe as being within a 40-acre subdivision of public survey, and by course and distance to a found section corner. If on unsurveyed land, it should be so stated.)

Located in the NW1/4 SE1/4 Section 16, T. 13 N., R. 70 E., M.D.B.&M. and which the SE corner of Section 16 bears South 56°13'32" East, a distance of 2,463.32 feet. Reference map# 72985.

6. Place of use: (Describe by legal subdivision. If on unsurveyed land, it should be so stated)

Sections 11, 12, 13, and 24 of T. 13 N., R. 69 E., M.D.B.&M. and all of Sections 4, 5, 6, 7, 8, 9, 16, 17, 18, 19, 20, 21, 28, and 29 of T. 13 N., R. 70 E., M.D.B.&M.

7. Use will begin about January 1 and end about December 31 of each year.
Month and Day Month and Day

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) (State manner in which water is to be diverted, i.e. diversion structure, ditches and flumes, drilled well with a pump and motor, etc.)

An existing 8" well is already completed to 258 feet. The well is equipped with a 25 HP submersible pump and motor that is connected to the Baker distribution system.

9. Estimated cost of works: \$300,000

10. Estimated time required to construct works: Existing well with pump and motor connected to distribution system.
(If the well is complete, describe works.)

11. Estimated time required to complete the application of water to beneficial use: Ten (10) Years

12. Provide a detailed description of the proposed project and its water usage (use attachments if necessary): (Failure to provide a detailed description may cause a delay in processing.)

Water rights under certificate 16454 are sufficient for current water usage by the residents of Baker, NV. An application to move some additional water will provide for some expansion in the near future or high demand years. This application is being made for future expansion within Baker, NV. 341.87 acre-feet annual is being requested. Combined with the other two permits, this would allow the system to continuously provide 250 gpm.
